Feb 24, 2018 This an automated program that can fix captcha on sites that support it. . CAPTCHA A: The code that you posted is not regular javascript. It is jq (a JavaScript library that you probably also used). This is very likely a mistake. Also: this problem has been solved before (mostly in the comments here on Stack Overflow) - some websites no longer use reCAPTCHA, and some use a different technique that is hard to solve automatically. You can find the different ways to solve CAPTCHAs here on Wikipedia. However, CAPTCHAs are likely a good idea. A human being can solve them a lot faster than a computer. You probably want to use this service - it is quite reliable and fast (average response time is less than 100ms) - for example: You are here Main Search Featured Searches The population trends and number of computers are very different in the different countries in East and South East Asia. Singapore enjoys the highest per capita number of computers in the region with over 730,000 computers. The population is almost double that of the second highest country Vietnam with around 495,000. Vietnam ranks sixth in terms of number of computers after Hong Kong, Macau, Taiwan, Japan and South Korea. The proportion of private computers in the region has now reached almost 30% and the most common device types are PC, laptop and desktop. It is remarkable that in spite of a generally poor internet infrastructure, only 12% of the countries in the region have internet subscription rates greater than 50%.Huang Keqiang Huang Keqiang (born 7 June 1986) is a Chinese badminton player.
