Hello. The game does not work well at all for the \$9.99 price tag. Online does not work in connecting with friends. The tutorial works kinda but the controller support is buggy as. The buttons are rotated clockwise by 1. (a is x, x is y etc.) Analog sticks dont work well and spell selection isnt stated very well either. The timer states a minuet but ran out after 20 seconds. The game has crashed twice on me as well just trying to start up a game of online with no one else. I could not find a random game either. I will refund this game and hopefully it works better in the future.. Hey devs, The online multipler for your doesn't work. You can not invite friends online at all. Your game also crashed twice, I'm sad now because I gifted this game to my friend to pay with but now I've given him a broken game. I was really excited for dumping a whale on him, usually i whale on my friend in games but was disheartend that i didnt get the oppertunity to do so with an actual whale.

I really hope that you fix these bugs because your game looks awesome! I wish i could have done the tutorial but the keyboard support was broken too. I'll be regretfully refunding this game. I wish you all the best. GOOD LUCK
